Dr. Niraj Kinariwala is a proficient clinician and academician with expertise in contemporary endodontics and digital dentistry. He is a passionate proponent of magnification and digital dentistry.

**Work Experience:**

- Associate Professor, Department of Endodontics, Karnavati University, India (2015-2022)

- International Guest Speaker at World Dental Conference at Dubai in August, 2018.

- Dynamic navigation integrates surgical instrumentation and radiologic images by using an optical positioning device controlled by a dedicated computerized interface. It allows surgeons to place implants with accuracy.
- In Endodontics, it is used for localization of calcified canals, management of various canal morphologies and root-end resection surgeries. Treatment planning and surgery can be performed in the same appointment. This technology allows safe, minimal invasive and predictable access opening, osteotomy as well as root-end resection.
- These features could help in reducing the risk of unintentional iatrogenic damage to nearby anatomic structures and perform minimally invasive or flapless surgery, leading to reduced patient postoperative discomfort and improved healing.
- Following the lecture there will be demonstration on model as well as on patients.
